

Anton Bojko

FRONTEND DEVELOPER

About Me

Frontend developer with experience in creating web applications. I am proficient in various development tools and methodologies. I pay attention to design and projects optimization, striving for perfect layouts and clean code. In my free time I study new technologies, read literature, documentation and articles to expand my knowledge and skills.

Social activity

Since 2019, I have been actively participating in the professional web developer community on one of the popular online forums. I addressed issues related to web technologies and also served as a moderator, ensuring high-quality discussions and providing support for both newcomers and experienced developers.
